The tune 'Missing' by Everything But the Girl was remixed by Freshcobar. While in the studio Golden Girl heard the tune and immediately wanted to cover it. She asked if she could and the two then embarked on their first collaboration together. While Freshcobar already had the tech house driven groove and bassline along with the original Everything But the Girl vocals, Golden Girls brings an added touch to the track giving it a bit more of a modern feel.

"Remembering a time where we were missing someone as much as we miss the rain is how we are feeling in this 90's cover from Everything But the Girl. Bringing back an emotional moment in a heartfelt dance setting we don't want to forget."

Golden Girl With Freshcobar slated for numerous releases on his own imprint NOS Recordings (No Ones Safe) this is just one of many slated for release this year. Furthermore this tune has critical acclaim on dancefloors as DJs including Freshcobar and a few other locals have been dropping the original remix in their sets and people are very excited for this tune to be released. Remember... No Ones Safe!
