### INTERVIEW WITH UNER – 2013 NEWCOMER NOMINEES

**o Welcome to the DJ Awards... You have been nominated in the “Newcomer” Category, how will you celebrate if you win?**

I have not thought about it, but I would give a big hug to my family and my team, and congratulate them for their hard work since the award is also part of their work to reach a higher aim.

**o What has been your most memorable gig so far this year?**

Every session is really special and I have very good memories of them all. If I have to remember the most recent gig, it was probably the week of my birthday at Pacha; where there was an incredible energy, the club was packed, great friends around and I could experience a very special atmosphere.

**o Out of all the tunes you have, which one “never fails”?**

Time passes by and things change, a couple of years ago Pallene was never absent, now it is Undisclosed, which will be included in my first artist album that will see the light after the summer.

**o If you ended up on a desert island, which piece of music equipment could you not live without?**

I could live without any of my equipment, having my family always with me is more important, so my music does not make sense without them.

**o The genres of music are continually evolving, what’s your prediction for the next new musical style?**

It is complicated to predict what will happen tomorrow especially if the fans make their choice, their way, but I think the organic vocal deep sounds could be a next step. Even so most of the new sounds have been awakened from their influences from the subgenres of music.

**o The DJ Awards has some special awards not voted for by the public – one of which is “Track of the Season” what is your prediction on the track that will blast the dancefloors?**

I’m going to tell you 3 instead!: Ten walls “gotham”, Tale of us “another earth” and Claude Vonstroke “The clapping track”.

**o They are 2 new DJ Award categories this year; “Breakthrough Artist & Record Label”, what are your thoughts on the recipients?**

Probably Tale of us and Ellum.

**o If you would like to pick anyone, whether its a musician, producer, singer or artist to work with, who would it be?**

If we speak about electronics, Laurent Garnier now and always without any doubt. If we talk about musicians, Paco de Lucía (impossible) or Bebo Valdés this would have been an authentic honor.

**o If you had 24hrs off in Ibiza what would you do?**

Try to sleep more than 3 hours and going out with my friends investigating new good, fresh and healthy Mediterranean restaurants before I start making music using the magic of the island.

**o If you travel in the time machine, which year would like and why?**

1977. August 5th. To be born again and repeat every single second of my life as I have lived with people that have lived.

You still have time to vote for Uner at [www.djawards.com](http://www.djawards.com).
