# KRYOMAN: DARKNESS FEATURING ANDREW COLE OUT TODAY

July 1, 2016 By amfmstudios

## HE'S MORE THAN JUST A ROBOT

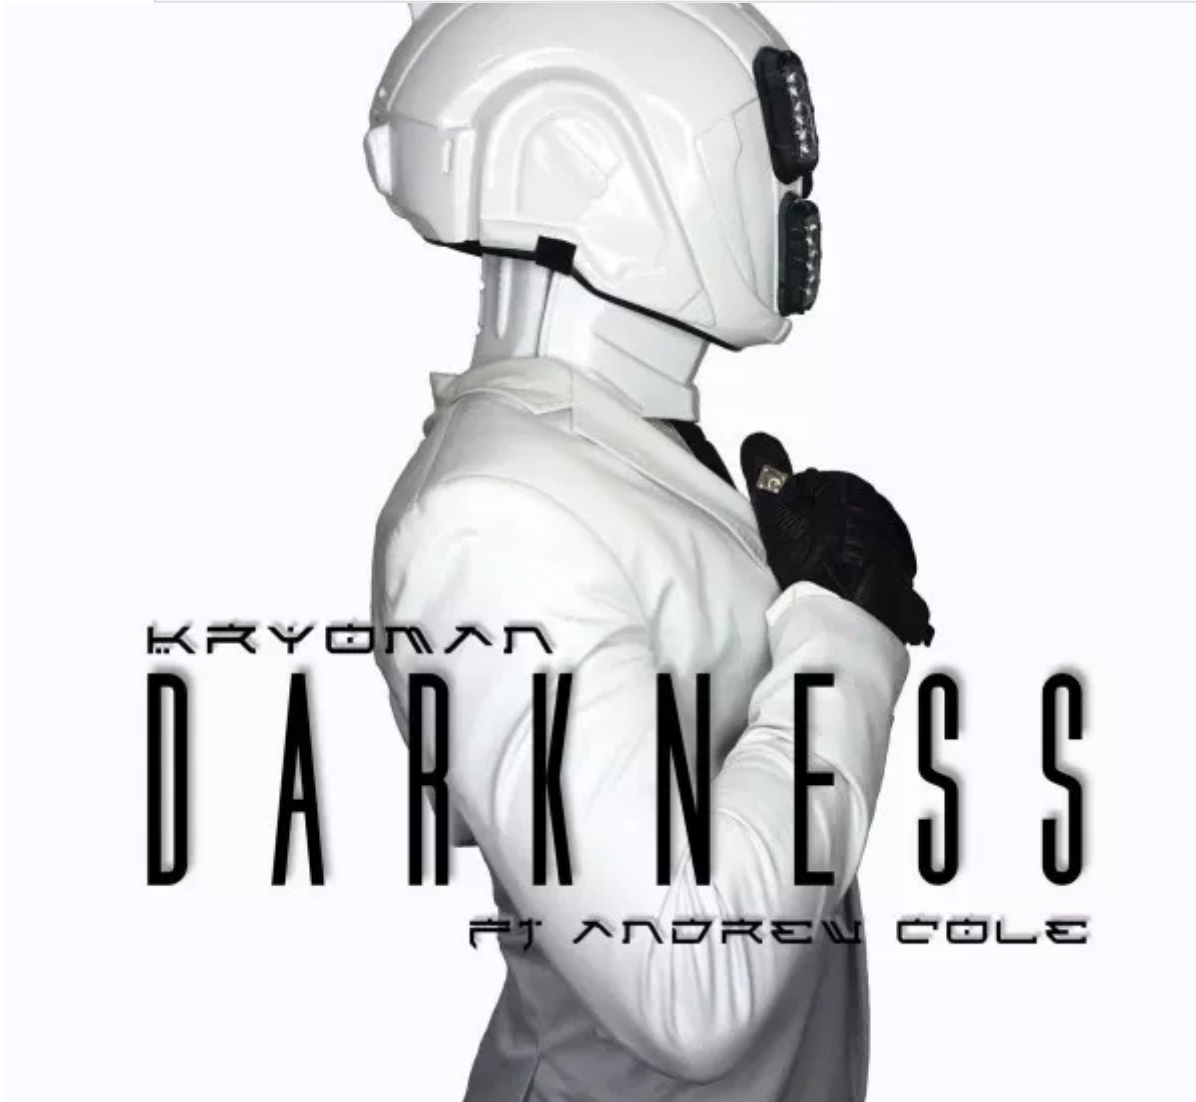

The release of Kryoman's new single Darkness (Ft Andrew Cole) is available today. This is the first installment of his latest project "Blackout" 5 single releases Kryoman will be putting out over the remainder of 2016.

Ethereal vocals from Billboard Top 20 artist Andrew Cole and hard-hitting electro dance beats from EDM artist KRYOMAN are joined together in this slamming new video. The pair got together to write a pop song about falling in love with a robot...and it's easier said than done – especially if she's cross-wired on the inside. With lines like "I only see you in the darkness" and "I shouldn't call you it's over," Cole asks "what happens when you fall in love with a robot." something that is actually happening as roboticists have already developed human-like robots. They are even betting that computers can work alongside each other and even develop relationships.
